Canadian Foundation for Infectious Diseases

*Preventing and Treating
Infectious Diseases*

The Canadian Foundation for Infectious Diseases (CFID) is a charitable organization committed to improving the health of Canadians through the support of research and dissemination of knowledge pertaining to infectious diseases.

Working in partnership with the Association of Medical Microbiology and Infectious Disease Canada (AMMI Canada), the Community and Hospital Infection Control Association of Canada (CHICA-Canada), and other strategic partners and supporters, CFID will hasten the discovery of innovative solutions to better understand, prevent, control and treat the hundreds of existing and emerging infectious diseases that threaten our good health. CFID pledges to use every dollar raised responsibly and productively to aid the identification, prevention, control and treatment of infectious diseases.

CFID programs include:

- **The Safe Drinking Water Research Fund** for the purpose of ensuring safe drinking water in Canada and throughout the world, and especially in developing countries
- **The Antimicrobial Resistance Fund** to support research in the control of antimicrobial-resistant organisms and the diseases they cause in humans
- **The ROAR (Realize Opportunities to Advance Research) Fund** to support research into the diagnosis, treatment, prevention and control of infectious diseases
- **2 x 10 Infectious Disease Professional Development Endowment Fund** to establish an endowment fund to support research, education and advocacy in infectious disease
- **The CFID Undergraduate Summer Research Awards** to attract bright young minds to the field of infectious diseases, microbiology and infection control, and to fulfill the CFID mission of supporting research in infectious diseases

To support research and education on the prevention and treatment of infectious diseases, visit the Canadian Foundation for Infectious Diseases website at www.researchid.com or send your contribution to:
